Alert Box

#. Alert is a part of same page.
#. This is called javascript alert,php light box.
#. It is not a pop-up
#. Until we do not handle alert,we cannot perform any action in parent window.

Handling Alert using Selenium:-

#. In Selenium we have pre-defined interface known as Alert.
#. Alert Interface has 2 methods as:-
1. accept() :- Will Click on OK button when alert display.
2. dismiss():- Will click on Cancel button when alert display.
